

Serial No. 10728,966

AMENDMENTS TO THE CLAIMS

1. (Currently amended): A clitoris stimulator, comprising:

5 A) electrically driven vibrating means; and

B) clip means for removable attachment to the vaginal labia of a user, said clip means being mounted to said vibrating means so that said vibrating means is kept in contact with the user's clitoris; said clip means includes first and second spring biased arm members cooperatively mounted to said vibrating means to provide sufficient gripping action against predetermined areas of said vibrating means so that a portion adjacent to the edges of a user's labia on one side is releasably held between said first arm and said vibrating means and the labia on the opposite side is releasably held between said second arm and said vibrating means.

10

15

2. (Cancelled)

20 3. (Previously amended): The stimulator set forth in claim 1 wherein said clip means includes a rigid curved plate with a central portion, first and second ends, said central portion being rigidly mounted to said vibrating means and said first and second ends being kept at a spaced apart relationship with respect to said

25 vibrating means so that said first and second arm members cooperate with said first and second ends to provide sufficient grip action to a user's vaginal labia to keep said stimulator in place.

Serial No. 10 728,966

4. (Currently amended): A clitoris stimulator, comprising:

A) electrically driven vibrating means;

5 B) tubular holder means for removably receiving said vibrator means; and

10 C) clip means for ~~removably~~removable attachment to the vaginal labia of a user, said clip means being mounted to said holder means, said clip means includes first and second spring biased arm members cooperatively mounted to said vibrating means to provide sufficient gripping action against predetermined areas of said vibrating means so that a portion adjacent to the edges of a user's labia on one side is releasably held between said first arm and said vibrating means and
15 the labia on the opposite side is releasably held between said second arm and said vibrating means.

5. (Cancelled).

20 6. (Original): The stimulator set forth in claim 54 wherein said clip means includes a rigid curved plate with a central portion first and second ends, said central portion being rigidly mounted to said vibrating means and said first and second ends being kept at a spaced apart relationship with respect to said holder means so that
25 said first and second arm members cooperate with said first and second ends to provide sufficient grip action on a user's vaginal labia to keep said stimulator in place.
